

Information about Green Garden Resort, Cha-Am

We are proud to present a housing community where we love to live ourselves

Timeshare projects operating under suspicious circumstances are now widely available across the country. We are not denying the fact that there are respectable and good-value timeshares available in Thailand but some of those we are familiar with are based on too high pricing and poor quality standards. This can lead to unpleasant surprises later on, and a perhaps an unsellable villa/share.

It has been important for us, in all aspects, to create a quality project where our customers can feel 100% secure during the entire process, and where the price is kept at a level that makes it possible for most people to fulfill their dream of having their own home away from home. Our concept is quite unique as we offer our customers part ownership of their Green Garden Resort Pool villa and aim to create a life for them without worries or hassles. In understanding our customers' needs as well as the global economical situation, we have created a package-deal that eliminates all unnecessary bumps on the road, being partial owner of your personal resort getaway. The whole process is made as easy and transparent as possible.

The transparency in your ownership is total and all expenses are carefully explained in a simple fashion. There are no hidden expenses now or later. It has been our ambition from the very beginning to create a quality resort where we would feel at home ourselves. This only becomes true due to the fact that we - the creators and builders - live in Green Garden Resort ourselves!

We are lovers of the "good life" and we appreciate comfort. Green Garden Resort Cha-Am is created for those like us, which is apparent in all aspects of the resort. All luxury features built into the project ensures optimal pleasure and comfort. All this is included for a price never seen before. To sum it up, Green Garden Resort is the ultimate experience and investment for a very attractive price and the only thing you need to worry about is how to enjoy your time here as much as possible. Everything else will be taken care of for you.

We are not selling all-year vacation rentals but a holiday in your own house - and for a fraction of the price. It is up to you when you would like to stay, and your home will always be ready and clean for you when you arrive. We call it your home because you own it.

We enjoy good wines, golf, massage, social activities and good food. We love the wireless internet, our maids - and the fact that we are able to order our food from outside to be enjoyed in our own home. A trouble free existence without complications. So, it has been quite natural for us to include all these wonderful things into our project. Become a part of our easy and comfortable way of living by owning your own Pool Villa in the Green Garden Resort of Cha-Am.

The experience already starts from home. You log into your personal page through our online interface and specify on which date you will arrive in Thailand. You now have the option to choose if you would like to arrange a pick-up from the airport and you are also able to order a re-fill of your fridge with drink and other necessities. Our service team will make sure that your private belongings are made available to you upon your arrival. This includes books, cd's, movies and what else you might have in your personal storage.

The online interface also gives you the option to change the dates of your stay with other owners of your villa. You are also able to keep in contact with neighbours and friend via the online interface. This interface also keeps you posted about any updates regarding Cha-Am and the Green Garden Resort project. Even the payment of common expenses can be done through this interface.

Your home will be ready on your arrival and when you arrive you might want to have a nice relaxing 2 hour massage before you get ready for a delicious dinner in the resorts restaurant. After a pleasant night's sleep your car is ready to take you wherever you would like to go.

The construction of the Green Garden Resort and the Green Garden Resort Hotel has already started, 12 months ago. The entire Green Garden Resort resort is set to be complete in the middle of 2012.

Please join us for a guided tour, and come see for yourself.
